Reason for Allowance

The following is an examiner's statement of reasons for allowance:

- in view of the Appeal Board Decision, and corrected drawings filed on 11/7/2003, the application is now a condition for allowance.
- the close references for the current invention are Lowenstein (U.S. 3,764,692) and Moffett et al (U.S. 5,656,314).

Lowenstein teaches that the potassium salt of hydroxy citric acid may be obtained from the garcinia acid lactone by base hydrolysis with potassium hydroxide.

Moffett et al teaches the process for obtaining the hydroxycitric acid concentrate from the fruit rind of the Garcinia by extracting it with water miscible organic solvent.

However, the instant invention differs from the prior art in that the claimed process is not obtained from the garcinia acid lactone ; the pH during the extraction and the refluxing period are unspecified; milling, sifting, blending ,and packing the dried product under nitrogen are not in the references In addition, unless all limitations of the claims are met, there is no prior art rejection. See In re Zurko 59 USPQ 2d 1690 (Fed Cir. 1991) and In re Lee, 61 USPQ 1430 (Fed Cir. 1991). In the industrial process, the aforementioned process is important.

Therefore, applicants' claimed subject matter would not have been obvious to the person with an ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
